

Oct 28

Dear Jack

Thanks for outlines of conference  
I'll reciprocate soon.

Your plans with Link & Wilson sound fine -  
we have reports of your progress in general which  
we had. Our progress is as follows:

- 1) New melan C, mutants to be
- 2) fast transformation of biochemical characters.
- 3) intensive work with our A. sugarless (hac + Met)

The thesis is being typed .. Sorry the Tins story left you out -  
It wasn't my fault! I had nothing to do with the fines  
story - Where is the linkage appearing?

Regards to Esther - yours Ed C
